NTT DATA

Modernize your systems

Taking full advantage of GenAI capabilities means you can gain efficiency while also reducing costs, increasing scalability and improving customer experience.

Overcome technology challenges and reduce technical debt so your business can continue to be innovative and strategic — offering more capabilities and better outcomes.

Experience the future of the insurance industry now by using our continuous and organic evolution services so you can hold a competitive advantage.

Services to support your system modernization solution

Mainframe Modernization
We help you prepare for GenAI innovations by reducing technical debt and empowering your business through expert mainframe modernization and migration services.

Application Modernization
We modernize your applications, reduce technical debt and set you on a path of continuous innovation that supports GenAI technologies, leading you to the business transformation you demand.

Product-Centric Development
We transform your ideas into real-world products and platforms that enable GenAI advancements, provide new value streams and enable technology-driven growth.

Strategy, Architecture and Portfolio Management
Prepare your business transformation for GenAI by optimizing your application portfolio. With a precise roadmap, we enable you to reduce technical debt and increase operational transformation.

Enterprise Applications
Empower your business with our comprehensive, configured platform services through hyper-automation. From expert advisory to implementation and management services, we help you use the advancements and power of GenAI technologies.
