

Accelerate your agentic AI journey with a structured, value-driven assessment

Our Agentic AI Jumpstart Assessment helps you identify where AI agents can deliver the most impact. We guide you from ideation to implementation with a clear roadmap and a return on investment (ROI) analysis.

Gain clarity on your agentic AI opportunities

You may be eager to adopt agentic AI but aren't quite sure where to start, what benefits to expect and how to manage cost and risk. Our Agentic AI Jumpstart Assessment eliminates this ambiguity with a practical, outcome-focused approach to identify where AI agents can be applied. We help you define enabling technologies and deliver a phased implementation roadmap supported by ROI and value analysis.

A structured 4-6 week engagement, tailored to your goals

Our agentic AI experts guide your stakeholders through a focused engagement designed to:

- Reimagine your current end-to-end processes and operating model
- Identify where autonomous AI agents can be applied and to what degree
- Define enabling technologies and conceptual architecture
- Estimate the business case and ROI with specific time-to-value recommendations
- Deliver a phased implementation roadmap with quick wins and long-term value

The assessment gives you a clear understanding of agent opportunities, business impact and next steps for effective implementation and adoption.

Real-world use cases to unlock value

In addition to industry- and domain-specific applications, agentic AI can be applied across universal business functions to reduce costs, increase efficiency and improve customer experiences. Our assessment highlights the most impactful opportunities, including:

- **Contact center:** AI-enabled knowledge management, call summarization, real-time compliance and ticket reduction
- **IT service management:** Workflow orchestration, resolution summarization and higher customer satisfaction through self-service
- **Procurement:** Contract drafting, compliance checking, vendor discovery and proposal evaluation
- **Sales:** Lead qualification, outreach and personalization at scale, approach success analysis
- **Software:** Testing and remediation to speed coding and reduce defects
- **Supply chain:** Demand forecasting, inventory optimization, labor scheduling, exception rerouting
- **Accounting:** Payable/receivable processing, quote-to-cash and record-to-report management, reconciliation

How the engagement works

The Agentic AI Jumpstart Assessment is designed for organizations with leadership commitment to AI, robust infrastructure, quality process data and strong governance in place. The engagement runs over four to six weeks,

with your team committing two to four hours per week. Our delivery team includes an engagement lead, business analyst, AI subject matter expert (SME), industry SME and financial analyst.

What we deliver

Reimagined process map Visual mapping of current workflows with agent roles and responsibilities clearly defined	Agent payoff matrix Prioritization of agent opportunities based on benefit and complexity, enabling quick wins and long-term value	Phased implementation roadmap Co-designed next steps for delivering identified agents, proofs of concept (POCs), and scaling operations	Organizational change management recommendations Guidance on stakeholder engagement, training and adoption strategies for successful implementation	Conceptual architecture High-level architecture tailored to your existing tech stack, including enabling platforms and integration points
ROI analysis Financial modeling with time-to-value analysis to support investment decisions and stakeholder buy-in	Security and risk overview High-level guidance for mitigating risks and achieving compliance in target processes	Agentic quotient score Proprietary maturity benchmark across people, process, technology and governance dimensions	Use case qualification framework Structured evaluation of candidate processes based on strategic alignment, data readiness, ROI/value impact and scalability	Assessment report Comprehensive summary of findings, recommendations and next steps tailored to your organization's priorities

4 steps from discovery to deliverables

Turn your agentic AI ambition into measurable results

The Agentic AI Jumpstart Assessment gives you clarity on where agentic AI delivers the most value, supported by a clear roadmap and financial case. You can accelerate time to value, reduce adoption risks and build confidence with stakeholders by aligning opportunities to measurable business outcomes.

Why NTT DATA

We bring unmatched experience, global scale, and trusted partnerships to help you succeed with agentic AI.

- **Strategic alignment:** We connect AI opportunities directly to your business goals, so every initiative is impactful and achievable.
- **Proven methodology:** Our structured workshops and scoring frameworks eliminate guesswork and accelerate value realization.
- **Global recognition:** Consistently recognized for AI, generative AI and agentic AI services value by leading analyst groups globally.
- **Deep expertise:** Backed by over 40 years of AI research and development, a Global AI Office, an AI Center of Excellence, 7 Innovation Centers, and 10,500 data and AI experts across 70 countries.
- **Trusted partnerships:** Our strategic collaborations with Microsoft, Google, AWS, OpenAI and other market leaders give us (and you) access to the best platforms and technical expertise.

Take the next step in your agentic AI journey
