

The background of the slide is a dark, abstract composition of light trails. These trails are primarily in shades of blue and white, with some yellow and orange highlights, creating a sense of motion and depth. The trails appear to be curved and layered, giving the impression of a futuristic or high-tech environment.

Business reimaged with agentic AI for Google Cloud

March 2026

Scale agentic AI across your enterprise

Reimagine your business and unlock measurable value with NTT DATA agentic AI for Google Cloud.

Powered by Gemini Enterprise. Enabled by NTT DATA.

Agentic AI is changing how organizations operate

Agentic AI isn't just automation — it's a shift in how work gets done.

Autonomous agents are becoming part of day-to-day decision-making

Enterprises are scaling beyond pilots

Legacy systems are being replaced with adaptive, intelligent workflows

Agentic AI for Google Cloud enables faster decisions, lower costs and greater agility.

How agentic AI is transforming business processes

NTT DATA is helping enterprises across industries to modernize business operations using agentic AI on Google Cloud Platform and NTT DATA's agentic AI framework.

Retail and banking

Customer service and sales agents manage the entire customer journey and resolve issues autonomously, resolving problems faster, increasing satisfaction and reducing service costs.

Manufacturing

Intelligent agents autonomously monitor operations, optimize supply chains, predict equipment failures and orchestrate end-to-end processes in real time — helping manufacturers shift from reactive decision-making to proactive, data-driven business models.

Customer experience

Customer service agents manage all interactions with a customer across communication channels, improving speed and service quality.

IT and digital operations

IT operations agents autonomously monitor systems, detect anomalies and resolve incidents to maintain reliability and performance.

Logistics and supply chain

Logistics and inventory agents optimize delivery routes and proactively address issues in real time to ensure smooth, efficient operations.

NTT DATA delivers end-to-end agentic AI for Google Cloud

From strategy to scale

- 1 Strategy and prioritization**
Identify high-value agentic AI use cases
- 2 Design**
Architect secure, scalable agent ecosystems
- 3 Build and deploy**
Develop and integrate Gemini-powered agents seamlessly across enterprise platforms
- 4 Operate**
Monitor, govern and optimize performance
- 5 Scale**
Implement agentic AI across the enterprise

Why NTT DATA for agentic AI

NTT DATA combines deep industry expertise with Gemini and Vertex AI to help enterprises move from AI pilot projects to enterprise-scale impact. By supporting enterprises across the full agentic AI journey, from strategy and design to deployment and optimization, we enable secure, scalable and responsible AI adoption.

Harness the full potential of agentic AI

Experience the speed, agility and efficiency of agentic AI. Accelerate innovation and transform business operations across your organization.

AI leaders are:

nearly 2.5x
more likely to achieve
double-digit revenue growth

3.6x
more likely to operate
at margins above 15%¹
