Nothing comes close

The impact of Cortex XSIAM with NTT DATA

Modern enterprises are drowning in siloed tools and fragmented data. By unifying SIEM, XDR, SOAR, and threat intelligence into a single AI-driven platform managed by NTT DATA, organisations move from reactive patching to proactive, self-driving security operations.

The financial benefit

244% ROI over three years

$5.3M net present value (NPV)

<6 months to payback

$3.1M tooling savings from retiring legacy SIEM, SOAR, and EDR/XDR platforms

The effectiveness benefit

85% reduction in mean time to remediation (MTTR)

85% reduction in alert volume

60% improved security posture

70% case load reduction

"The ROI is very visible. The board sees metrics like mean time to detect and remediate, and they understand how much faster and more effective we've become."

VP of Global Security, Business Process Outsourcing (BPO) Enterprise

Proven success in transforming global security operations

Case study 1: Global technology and manufacturing

The challenge:

Faced business disruption from significant security incidents and suspicious firewall traffic, with internal sources triggering thousands of disconnected alerts.

The solution:

NTT DATA's DFIR team performed extensive intrusion analysis and deployed advanced tools to gain total visibility.

The outcome:

Successfully transformed SOC operations, significantly improving the organisation's ability to detect and resolve threats effectively.

Case study 2: Manufacturing and medical sector

The challenge:

A federal agency alert identified an active intellectual property theft attack by a sophisticated threat group.

The solution:

Leveraging detailed intrusion analysis and forensic investigation to map the attacker's path and exposure.

The outcome:

Provided critical insights into security vulnerabilities and hardened the SOC by enhancing defensive measures and response capabilities.

> "I think they [Palo Alto Networks] do have the holy grail right now [with Cortex XSIAM]. I didn't find anything better when we were looking. And it works: that's the key."

VP of SecOps, Technology Services

Industry recognition

#1 Global Provider

NTT DATA is ranked #1 by revenue for CSP Managed Security Services (Gartner 2024).

Product of the Year

Cortex XSIAM is the CRN 2025 winner for Security Operations Platforms.

Global MSSP of the Year

Awarded to NTT DATA by Palo Alto Networks.

Map your path to a self-driving SOC

Book a free 90-minute workshop with an NTT DATA solution architect to map a solution to your top-three security pain points.
