

Integrated Policy for Quality, Security, Innovation, Service Management, and Artificial Intelligence

Integrated Policy for Quality, Security, Innovation, Service Management, and Artificial Intelligence

As an organization, we provide our clients with business and technology services through a broad portfolio of strategic consulting, applications, infrastructure, and BPS services.

We bring extensive experience across all economic sectors and deep knowledge of the geographies where we operate. We position ourselves as a company strongly committed to innovation, fostering an innovative culture aimed at delivering impactful results.

Through senior management, we commit to establishing, implementing, and maintaining an updated policy for Quality, Security, Innovation, Service Management, and Artificial Intelligence, aligned with our strategic direction. This policy is supported by management systems based on the following international standards ISO 9001, ISO 270001, ISO 56001, ISO 20000-1 e ISO 42001. These systems enable us to:

Meet the requirements and expectations of clients and stakeholder.

Comply with applicable ethical, legal, regulatory, and normative obligations.

Protect the availability, integrity, confidentiality, authenticity, and traceability of the information used in service delivery, as well as its transmission and/or communication channels, by implementing the necessary organizational and technical measures and establishing clear responsibilities for data processing.

Manage innovation in a structured way, setting strategies and objectives to enhance our capacity to create value.

Promote continuous improvement, upholding it as a fundamental pillar for the development of our activities and the achievement of our objectives..

We are committed to building a culture where people grow, fostering continuous learning, transparent conversations, and valuing diversity and collaboration.

This commitment is aligned with our purpose as a company: to respond swiftly to the changing needs of our clients and to anticipate the future with ethics and intelligence.
